x Based on 1961-90 normals.

Delta Weather and Crop Summary: A strong upper-level ridge dominated the Delta region, bringing very hot, mostly dry conditions. The second week of July was by far the hottest of the year, as temperatures frequently reached or exceeded the 100°F mark. Crops required heavy irrigation. Corn continued to mature and 85 percent of the State's cotton was setting bolls.

Average Pan Evaporation (Inches)

JUL 9 - 15, 2000
